Softonic review Lunime, the brains behind the popular Gacha Life, recently published a new gacha game called Gacha Club. Originally intended as an update, this role-playing game will offer a brand new experience for players. In it, you will collect and enhance your chibi characters to fight the battles. There is also an option to explore different events. Of course, there is still a studio where you can customize your club members and create scenes. Welcome to the club! As mentioned, Gacha Club is intended, at first, to be an update to Gacha Life. Hence, players will see some similarities in the gameplay. In Gacha Life, you will have eight main character slots and 12 extra slots. In Gacha Club, meanwhile, there will be ten main characters and 90 extra slots. There will be 11 hand gestures that are not available in Gacha Life. The game will also allow the player to gacha for characters and pets, instead of gifts. Unlike the original life game, they can also do 40 gacha roll at once. Gacha Club is packed with battles, mini-games, and customization functions. The game has four battle modes, a story mode, training mode, element tower mode, and shadows corruption mode. Players can play these modes to earn coins and gems, which then can be used to get the units, pets, and other things. You can also take a shot in playing the mini-games to earn the currency called Byte. Other than the battles and mini-games, players can also use the studio to create scenes. You can import and export your characters once you reach level ten. In addition to new stuff, Gacha Club also boasts a good graphic design. However, players will note that some of the old props—smoke clouds, cite food props—are missing. There is also no option to randomize the colors and the names of your characters. Moreover, there is also limited choices for hair and clothes. For gacha fans Overall, Gacha Club is an improvement to the Gacha Life. In this game, players will not only play dress up but can also battle other players. There are more character slots, and there are more ways to increase your stats. More, there are more scenes that you can save and load. If you love the original life game, then this game will give you a more exciting experience. You will be automatically redirected to the homepage in 30 seconds. Gacha Club is a fun game in which you can customize even the finest details of your Gacha anime characters, and then create epic scenes with them as if you were a movie director. Take a seat on the directors chair and choose the settings, the dialogues and the poses of the protagonists in your story. You can even add a storyteller to narrate the plot! contents Gameplay Graphics Game modes Age rating Cost System requirements Gameplay Character customization : There is an endless number of customization options for your Gacha Club characters. Size: 100MB Version: 1.1.0 Developed By: Lunime (Privacy Policy) Application Permissions: (Help me understand what permissions mean) Access information about networks Open network sockets Read from external storage Write to external storage Minimum Operating System: Android 4.0 Approximate Download Time: More than 5 minutes 1/5 Gacha Club Edition is a free gacha RPG and character creator for Android. It lets you create custom avatars down to the minutest detail and then set them up for battle. Additionally, you can create immersive stories using custom speech bubbles, backgrounds, foregrounds and much more. GC Edition is similar to other games like Gacha Star and Gacha Life in that it's a comprehensive, powerful character creator. Gacha Club Edition doesn't require the original Gacha Club app to run and doesn't change any of the mechanics of the game. This means anyone familiar with Gacha Club will feel right at home playing Gacha Club Edition. An exciting RPG The RPG side to Gacha Club Edition introduces a turn-based battle mechanic that your avatars can compete in. This game has four battle styles: training mode, tower mode, story mode and Shadows of Corruption. Training mode is quite self-explanatory—this is where you familiarise yourself with the RPG's mechanics. Tower mode is an endless battle scenario, while story mode is the game's main campaign. Story mode is where you level up your avatars and experience a story-driven battle scenario. Lastly, Shadows of Corruption is a second campaign mode where you face new characters, customise them and add them to your collection once they're defeated. A powerful avatar creator With Gacha Club Edition, you have the power to change your avatars at any time. Decide on the smallest details, like what custom shape you'd like as your avatar's pupils or what shade their skin's outline should be. Explore countless clothing options with even more combinations than the base game and put together a richly diverse cast of characters. Create your own stories Even though Gacha Club Edition is mainly an RPG with integrated avatar creation capabilities, the game has taken the social media world by storm in the form of user-created visual novels. You can use the wide array of backgrounds, foregrounds, speech bubbles and unique graphical elements to weave immersive stories and fill out your avatar's personality. Fun for all ages Given the game's core RPG nature, the minimum age restriction to play Gacha Club Edition is 10 years. The game, however, has elements most mobile gaming generations will enjoy. Some users report issues when installing or running the game on lower versions of Android, but otherwise, the game is capable, comprehensive and extraordinarily fun. We don't have any change log information yet for version beta of Gacha Club Edition. Sometimes publishers take a little while to make this information available, so please check back in a few days to see if it has been updated. Can you help? If you have any changelog info you can share with us, we'd love to hear from you! Head over to our Contact page and let us know.
