Winner of the Global Press Award at the 2007 Trade Show traffic light, E-Boost2 allows the user to control, monitor, map and compensate for the push. But E-Boost2 is much more than a simple boost regulator "" can also check the water spray, methanol or nitrous injection, manage the ignition / ignition lights and light / RPM monitor. The E-Boost2 was effectively checking up to six phases of push from gear, driven by RPM, driven from time to time, and more, up to 60 PSI for over a decade. All in an self-contained handlebar, with an excessive closure to keep the engine safe from damage. While E-Boost2 is equipped with cutting-edge software, it has been designed to be easy and logical to use. Standard now with 60PSi Maximum operating pressure, E-Boost2 is a full generation Boost management system. With the characteristics of the market leader and cutting-edge software, E-Boost2 is the only accessory that all the owners of turbocharged cars should have! Easy to use, but sophisticated and technologically advanced, the E-Boost2 is equally at home in a road vehicle as it is in a high-level racecar. E-Boost2 allows the user to control, monitor, map and compensate for the push. But E-Boost2 is much more than a simple boost regulator "" can also check the water spray, methanol or nitrous injection, manage the ignition / ignition lights and light / RPM monitor. While E-Boost2 is equipped with cutting-edge software, it has been designed to be easy and logical to use. Supplied with: solenoid, wiring frame, and pipes and pipes fixing kit. Image not available for color: To view this video download Flash Player Sale! Standard now with 60PSi Maximum Pushing Operating pressure! E-Boost2 is a full generation Boost management system. With market leaders and software characteristics E-Boost2 is the only accessory that all turbocharged car owners should have! Easy to use, but sophisticated and technologically advanced, E-Boost2 is just as at home a road vehicle as is located in a high-level racing car. E-Boost2 allows the user to control, monitor, map and compensate for boost. But E-Boost2 is much more than a simple boost-power controller also to check water spray, methanol or nitrous injection, manage shift lights/warning and laws/monitor turns/min. While E-Boost2 is equipped with cutting-edge software, it has been designed to be easy and logical to use. Increase levels: up to 6 push levels. Increase on request: provides instant overtaking power at hand mapping based on gears: set an increase in each march! Adjustable boost levels: strengthening of the program against time or number of laps / min. AUX output: fully programmable; Check water spray, methanol or nitrous injection. RPM Regalistic: Delete the high number of turns of boost drop-off. Peak Hold/Max Boost Recall: Boost and RPM monitor. Gate pressure: Delete the waste creep. Overboost Shutdown: provides additional protection for your engine. Display: programmable, can be configured on KPA, bar or PSI. Automatic dimming: with backlit buttons for navigation without problems. Image not available for color: To view this video download Flash Player
